FIVE EXCEPTIONAL BEDROOMS

Sleep at the château

On the second floor of this jewel of Provençal architecture, five bedrooms have been patiently reimagined. Each unfolds its own world, with furniture and objects acquired from leading art dealers or chosen at auction. From one room to the next the styles echo one another, telling the story of changing tastes from Louis XIV to the refined Louis XVI.

A personal experience is added to your event by occupying the château as people did in the eighteenth century: sleeping there, waking there and savouring every minute the pleasure of luxury without ostentation and the true refinement of the golden age. Elevate every facet of a defining moment in your life.
